## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 16-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The term "thin film filter" as cited in independent claims 16 and 23 is not taught in the specifications.

Claims 17-22 and 23-29 are rejected because of its dependency upon claims 16 and 23 respectively.

### ***Allowable Subject Matter***

Claims 9-15 and 30 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The examiner agrees with the argument set forth by the applicant that the prior art does not disclose a thin film coating including a gate angle such that light as cited in the independent claims.

Claims 10-14 are allowed because of its dependency upon claim 9.

***Response to Arguments***

Applicant's arguments with respect to claims 16-29 have been considered but are moot in view of the new ground(s) of rejection.

Regarding claims 16-29, these claims there are no mention of the limitation of the "thin film filter" mention in the specifications.
